

Concept Techniki SA is a competitive developer and contractor, whereas it has been a preferred partner for many international IPOs and other engineering and fabrication enterprises. The company holds vast experience as an EPC contractor, covering a wide range of technologies and solutions. It has been dedicated to further leverage the experience and expertise built up through project execution for almost fifteen years. Concept Techniki SA is tailored to meet EPC market trends and client demands.

The company has a focused and project oriented management and a mandate to enter into partnerships in order to establish reliable, flexible and competitive delivery models. To meet these goals our experts pay as much effort as necessary to elaborate a thorough and comprehensive documentation for each single project. A transparent documentation which moderates the risks and maximizes the feasibility of challenging investments.

From conceptual thinking to commissioning, Concept Techniki SA believes in committed attention to customer needs and nothing illustrates this better than its dozens of Turnkey Projects. Our management believes in the involvement of experienced project and operations managers in every project phase, from green field drafting to turnkey delivering.

The project packages are customized to suit all requirements taking care of interfaces of design, co-ordination and management. In Concept SA, we combine advanced project management, reference engineering, construction administration and cost consulting practices with proven professionalism, track record and independence, committed to quality of services for our clients.

Concept's experts take in advantage their deep knowledge of best development practices and their licensing expertise, in order to ensure a smooth and time effective preparatory stage and to prepare state of the art detailed engineering and rigid construction specs. In this way it implies low risk and stress for the investor, who has a single point of contact that simplifies communications. Moreover, the top quality standards in procurement and construction, the special attention to health and safety issues, as well as the dedication to the agreed delivering schedule are just few of the set administration features, which distinguish our projects.

In Concept Techniki SA the core business objective is to make customers successful through long-term cooperation and partnerships. That success comes from efficient process design, innovative engineering and a commitment to deliver reliable solutions. Therefore, prestigious clients secure their demanding investments by assigning their development and implementation to Concept Techniki SA.
